Weight	62.7 lbs.

Specifications subject to change without notice.

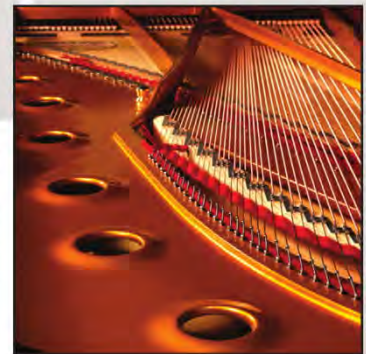

Authentic Touch

Kawai digital pianos enjoy an excellent reputation for their keyboard actions, with an uncanny ability to recreate the distinctive touch of an acoustic grand piano. The CL26's Advanced Hammer Action IV keyboard is no exception, featuring an innovative springless design for a smooth, natural playing experience. Just as an acoustic piano utilizes heavier bass hammers and lighter treble hammers, the AHA-IV action also employs different hammer weights appropriately graded for each playing range. Rugged construction assures a reliable action capable of satisfying the demands of even discerning pianists.

Exceptional Tone

The CL26 reproduces the beautiful sound of Kawai's world-renowned EX concert grand piano, with 88-key piano sampling techniques preserving the rich harmonic character of this glorious, hand-crafted instrument. From this thorough acoustic portrait, the CL26 employs Kawai's highly acclaimed Harmonic Imaging sound technology to faithfully recreate the broad dynamic range of the original grand piano. This unique process faithfully reproduces the broad dynamic range of the EX grand, from subtle pianissimos to thunderous fortissimos.

Slimline Design

With elegant curves and graceful simplicity, the CL26 is a modern classic from Kawai's award winning instrument design group. With a depth of just over 10 inches, this ultra-compact digital piano occupies a minimal amount of floor space and is tailor-made for today's contemporary living environments. Offered in a versatile Premium Rosewood finish, this stylish instrument blends effortlessly into its surrounding environment.
